EXPERIENCE

Oath

June 2017 - Present

Software Engineer – San Francisco, CA

After Verizon bought Yahoo, merging AOL and Yahoo together to form Oath, I continued to work as a front-end web software engineer for AOL.com. I work in Rails, Ruby, Twig, PHP, CSS, Sass and Javscript/jQuery. My oath: Forge your future.

Aol.

July 2015 - June 2017

Software Engineer – New York, NY & San Francisco, CA

After Ashe Avenue was acquired by AOL, my colleagues and I were integrated into the AOL Core team. The larger team works on core brands of AOL, and my smaller team primarily works on AOL.com. I handled front-end web engineering in Rails, Ruby, Twig, PHP, CSS, Sass and Javscript/jQuery. After Yahoo was bought by Verizon, this company merged with Yahoo to become Oath.

Ashe Avenue

October 2014 - July 2015

Web Developer – Brooklyn, NY

I was part of a small, fast-working team of developers that paired with design agencies to make awesome web experiences. I handled front-end development in Drupal, Rails, and Rack. This company was later acquired by AOL.
